EDUCATION

PUNE INSTITUTE OF COMPUTER TECHNOLOGY – Pune   *2020 – 2024*
Bachelor of Engineering, Information Technology Engineer
Cumulative GPA: **8.58/10**

CHAITANYA'S INTERNATIONAL SCHOOL – Baramati   *2018 – 2020*
Higher Secondary (12th)
Percentage: **77.69%**

EXPERIENCE

BAJAJ FINSERV | Tech: Kotlin, Firebase (Code |Certificate)   *Mar 2023 – May 2023*
Internship
- Worked on the project Bug-Detection Application using Kotlin and Firebase.
- Design different screen designs using **XML** file and load different kinds of gif to make interactive interface.
- Integrated the firebase in the project for the authentication using gmail and password

PROJECTS

(More Machine Learning projects available on GitHub – (Github link))

Krishak Farma (Code)   *Aug 2022 – Dec 2022*
- Android app for farmers to publish their products get best market prices.
- Technology used : **Flutter, Firebase.**
- Integrated functionalities : **Sign-In , Sign-up** authentication method using Firebase.
- Responsive **Chat bot** in order to resolve the common queries of the farmers using Dialog flow and Google Cloud Console.
- **Pop-Up notifications** using firebase in order to get dealers as well as farmers current market view of the product.
- **Dynamic Images/banners** load from firebase storage application.
- **Location tracker** using **Geolocator** and **Geocoding** packages in flutter.
- Future Scope : various **start-ups** can easily **trace** the nearby farmer to buy their products according to needs. **organic seed start-ups** , **dairy collection** can also trace nearby farmers for their variable milk product need.

Management App (Code)   *Jan 2023 – Feb 2023*
- Basic money management app to keep update of daily expenses.
- Technology used : **Flutter**.
- User will able to view **Statistics** according to expenses or income in day , week, month or year.
- **Statistics** is by using **syncfusion flutter charts.**

ACHIEVEMENTS

- **Special Recognition in Smart Pune Health (Hackathon 2023) - Ranked 6th** out of 150 teams for health care solution. (Code |Certificate)
  Contribution : Implemented frontend and backend of android app using flutter and firebase and implemented different supervised machine learning model for improve the accuracy.
- **Finalist WCE (Hackathon 2023) :** (Code | Certificate)
  Contribution : Implemented frontend and backend of android app using flutter and firebase.
- **Solved 500+** coding problems across various online judges .
- **250+ problems on Leetcode** : 100 Days badge 2022. (LeetCode)
- **5 Star** Coder on **HackerRank** in C++ . (HackerRank)
- **2 Star** on CodeChef, rating (**1585 Max**). (CodeChef)
- Scored **99.14 Percentile** in MHT-CET examination.

SKILLS

- **Programming** - Problem Solving, Data Structures, Algorithms.
- **Languages** - C++, SQL, HTML/CSS .
- **App Development** – Flutter Technology.
- **Databases :** MySQL , Firebase.
- **CS Fundamentals** - Object-Oriented Programming (C++), Operating Systems, Database Management System, Computer Networks.
